

# LEEB HARDNESS TESTER TH110

## Features

- Direct conversion of HL,HRB,HRC,HB,HV,HS; Conversion to tensile strength
- Direct display showing all functions and parameters
- Seven different kinds of impact device are available, distinguish automatically,no need calibration
- With high accuracy and wide measurement for all metallic material
- Inputting date, mark
- Software calibration
- Power charger and battery low indication
- Any test value can be printed directly
- Automatically switch off
- Easy to change rechargeable battery

## LEEB HARDNESS TESTER TH110

### Technical Specification

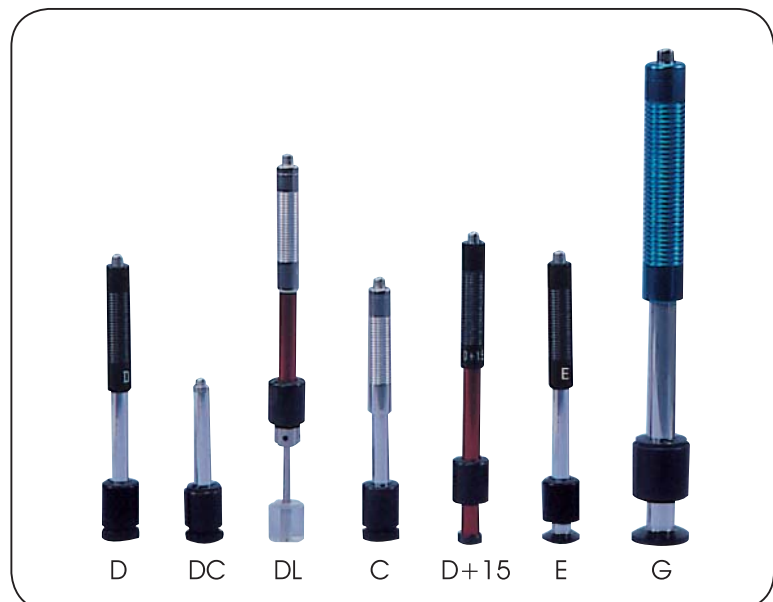

Measuring range	(170-960)HLD (17.9-69.5)HRC	Hardness scale	HLD,HS,HB, HRB,HRC,HV
Measuring direction	360°	Tolerance	± 6HLD (when HLD=760)
Repeatability	6HLD (when HLD=760)	Diameter for printer paper	40mm
Width for printer paper	44.5 ± 0.5mm	Power	12V/600mA
Charging time	2-3.5 hour	Humidity	≤90%
Operating temperature	0°C-40°C	Weight	0.615kg
Overall dimensions	235 × 90 × 47mm		

### Standard Delivery

- Main unit
- Printing paper
- Impact Device type D
- Leeb hardness test block
- Small support ring
- Nylon brush
- Charger
- TIME certificate
- Warranty card
- Instruction manual

### Optional Accessory

- Printing paper
- Special impact device
- Support rings

Technical specification of impact devices
